

CLASSIC KOLDA EBF 11

Blue colored OAT radiator protection concentrate based on 1,2-ethanediol (MEG)

Description

CLASSIC KOLDA EBF 11 is a blue colored, nitrite-, amine-, phosphate-, silicate- and borate-free radiator protection, based on 1,2-ethanediol (MEG) with the latest OAT technology for cooling circuits of combustion engines, e.g. in passenger cars and commercial vehicles.

CLASSIC KOLDA EBF 11 is free from the harmful 2-ethylhexanoic acid and fulfills the standards according to British Standard 6580:2010.

Application

CLASSIC KOLDA EBF 11 should be mixed with demineralized or distilled water in a mixing ratio of 50:50 or used in a concentration of min. 33 to max. 60 % by volume before filling into the cooling circuit.

Properties

- excellent corrosion protection
- good long-term stability
- good protection against thermal stress
- special sealing and workshop compatibility
- best possible frost protection

Product data

Properties	Unit	EBF 11*
Density 20 °C	g/cm ³	1.118
pH value 50% vol.	pH	8.4
Boiling point	°C	165

*are average values and may vary in the framework of the standard.

Performance

BS 6580:2010

ASTM D3306

ASTM D1384

SAE J1034

AFNOR NF R 15-601
