

CLASSIC KOLDA EBF 11 FG (40:60)

Blue colored OAT radiator protection ready-mix based on 1,2-ethanediol (MEG)

Description

CLASSIC KOLDA EBF 11 FG (40:60) is a blue colored, nitrite-, amine-, phosphate-, silicate- and borate-free, ready-to-use radiator protection agent based on 1,2-ethanediol (MEG) with the latest OAT technology for cooling circuits of combustion engines, e.g. in passenger cars and commercial vehicles. **CLASSIC KOLDA EBF 11 FG (40:60)** is free from the harmful 2-ethylhexanoic acid and fulfills the standards according to British Standard 6580:2010.

Application

CLASSIC KOLDA EBF 11 FG (40:60) is a ready-to-use radiator protection consisting of 50% radiator protection concentrate and 50% demineralized water, which is suitable for direct filling into the radiator circuit. The recommendation to the mixing ratio of the manufacturer should be observed! The maximum minus operating temperature of the ready-to-use mixture is -24°C.

Properties

- excellent corrosion protection
- good long-term stability
- good protection against thermal stress
- special sealing and workshop compatibility
- best possible frost protection

Product data

Properties	Unit	EBF 11 FG (40:60)*
Density 20 °C	g/cm ³	1.055
pH	pH	8.4
Frost protect	°C	up to -24
Boiling point	°C	108

*are average values and may vary in the framework of the standard.

Performance

BS 6580:2010
SAE J1034

ASTM D3306
AFNOR NF R 15-601
