

CLASSIC KOLDA UE G30[®] FG (40:60) READY MIX

Silicate-free OAT coolant. ready to use mixture 40:60 with BASF GLYSANTIN G30[®] Ready Mix Co-Branding, pink colored

Description

CLASSIC KOLDA UE G30[®] FG (40:60) READY MIX effectively prevents corrosion and deposits in the cooling system with its important components such as cooling channels in the cylinder head and engine block, radiator, water pump and heating heat exchanger. **CLASSIC KOLDA UE G30[®] FG (40:60) READY MIX** is nitrite, amine, phosphate, borate and silicate free.

Application

CLASSIC KOLDA UE G30[®] FG (40:60) READY MIX is a ready-to-use radiator antifreeze made from 40% radiator protection concentrate and 60% demineralized water, which is suitable for direct filling of the cooling circuit. The manufacturer's recommended mixing ratio should be observed! The maximum minus operating temperature of the ready to use mix is -25°C.

Compatibility

As the application advantages of this radiator protection agent can only be achieved by using only **CLASSIC KOLDA UE G30[®] FG (40:60) READY MIX**, mixing with other silicate-free coolants is not recommended. Mixing with coolants that do not conform to OAT technology is absolutely discouraged.

Product data

Properties	Unit	G30 [®] FG (40:60)*
Density 20 °C	g/cm ³	1.050
Frost protect	°C	until max. -25

* are average values and may vary in the framework of the standard.
