

CLASSIC KOLDA UE G48 FG (35:65) READY MIX

Blue-green colored silicate-containing hybrid-coolant
Ready to use mixture 35:65.

Description

CLASSIC KOLDA UE G48 FG (35:65) READY MIX is a blue-green colored ready-to-use coolant in the mixing ratio 35:65, based on **CLASSIC KOLDA UE G48[®]**, a coolant based on ethylene glycol as well as organic and inorganic inhibitors (hybrid technology). It provides an excellent frost-proof cooling liquid as well as outstanding protection against corrosion for all metals in the cooling systems of internal combustion engines, including aluminium. **CLASSIC KOLDA UE G48 FG (35:65) READY MIX** is nitrite, amine and phosphate free.

Application

CLASSIC KOLDA UE G48 FG (35:65) READY MIX is a ready-to-use radiator protective agent consisting of 35 % **CLASSIC KOLDA UE G48[®]** and 65 % water, for direct filling of the cooling circuit. The recommendation to the mixing ratio of the manufacturer should be observed! The maximum minus application temperature of the finished mixture is -18 ° C. Further another dilution with water is not recommended, because **CLASSIC KOLDA UE G48 FG (35:65) READY MIX** is ready for use.

Compatibility

The application advantages of this radiator protection agent are only achieved through the sole use of **CLASSIC KOLDA UE G48 FG (35:65) READY MIX**, therefore mixing with other silicate-containing radiator protection agents is not recommended. Mixing with coolants that do not comply with hybrid technology is strongly discouraged.

Product data

Properties	Unit	G48 FG (35:65)*
Density 20 °C	g/cm ³	1.06
Frost Protect	°C	until max. -18

* are average values and may vary in the framework of the standard.
